GERMINATION

ADELPHI RD - UMUC/UMD

GLOBAL CAMPUS + GROWING MINDS

** Approximated visualization composed for conceptual purposes, accurate data will be developed for final design*

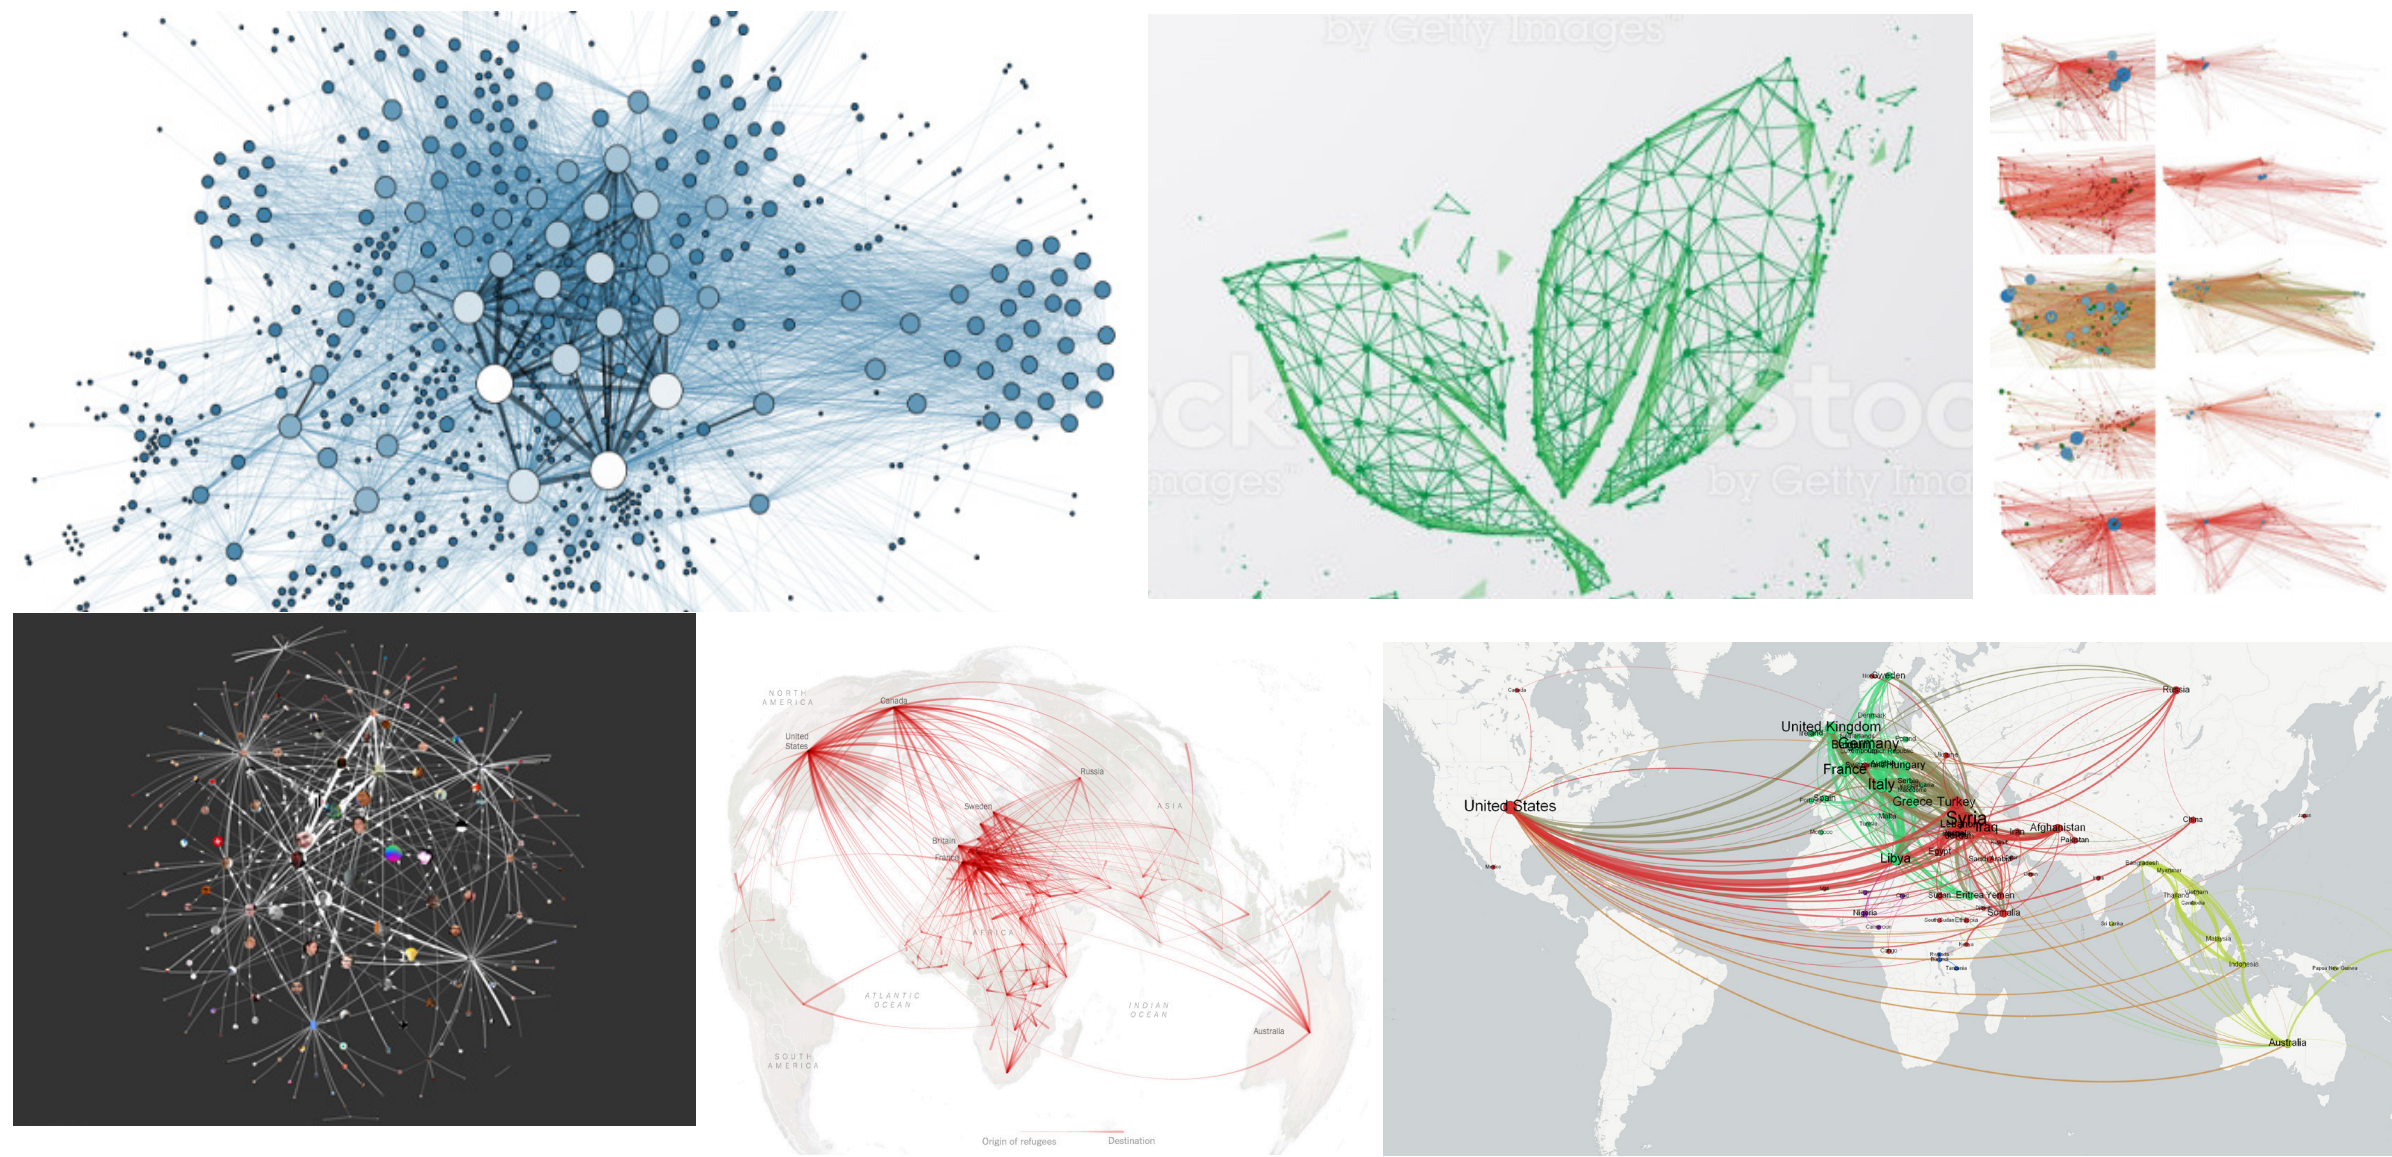

DATA: STUDENT HEADCOUNT PER LOCATION

Each circle represents a student location as well as the volume of students per location.

Color coded locations

- UMUC UNITED STATES
- UMUC EUROPE
- UMUC ASIA

Reference Data Visualization/Networking Images:

Primary focus is one sprout per glass panel connecting locations through a root visualization

Secondary network lines connect locations and loosely defining continents

Metal leaf structures' scale is relative to the headcount of students being connected in a given area. The structures are painted with industrial paint and clear coated.
