What is the Purple Line?

The Purple Line is a newly planned light rail train! When complete, the Purple Line will take you from the New Carrollton Metro station in Prince George's County to the Bethesda Metro station in Montgomery County. The Purple Line is planned to be 16 miles long with 21 stops along the way.

Hi Kids! I'm Purple Liam Light Rail. I am a shiny, new MTA light rail train. I can't wait to start my new job on the Purple Line! I'm just a little worried that I won't know the way. Can you help me stick to the rails and find my way from Bethesda to New Carrollton?

RULES:
Stay on the white path. You can't go through any barriers, words, or anything else that blocks a clear path.

HINT:
Look at the Purple Line map to the right. The stations are in order from left to right. You can use them to find your way.

Use this map to help you find your way through the maze. Starting at Bethesda, find a path to the next station on the line. Trace your path one station at a time.
